

Trans Health UK is an info website made by trans folk for trans folk. We started to support trans people in accessing healthcare during the COVID-19 pandemic and beyond.

We work to provide up-to-date UK information on:

- **Gender Identity Clinics:** current services, waiting list times, pandemic support for trans folk
- **Private Gender Clinics:** prices, services, processes, responses to the pandemic
- **GPs:** how to find trans-friendly GPs, how to access healthcare
- **Pandemic FAQs:** what to do if you can't get blood tests or hormones, how to get trans financial and healthcare support, and more

Information is being regularly updated as we find out more, and we're growing an archive of trans healthcare advice and support resources.

You can help us share information by emailing contributions to:
